SUMMARY

Dedicated Full Stack Developer with expertise in the MERN Stack and one year of professional experience. Skilled in developing scalable, user-focused solutions, with a passion for driving innovation and enhancing user experiences. Committed to continuous learning and leveraging cutting-edge technologies to make impactful contributions.

WORK EXPERIENCE

Cimpress India

Feb 2023 - Feb 2024

Software Engineer

- Migrated React codebase from JavaScript to TypeScript, increasing code maintainability and type safety, reducing runtime errors by 25%.
- Integrated Redux to streamline state management, resulting in a 20% improvement in application performance and reducing prop drilling.
- Developed a dynamic feature for image DPI calculation, improving user satisfaction by 20% by providing real-time customization quality insights.
- Enhanced security and reduced vulnerabilities by using serverless-webpack across all repositories.

EDUCATION

Bachelor of Engineering

Aug 2019 - July 2023

Nutan Maharashtra Institute of Engineering and Technology, Talegaon Dabhade, Pune

- Specialization in Information Technology - CGPA - 8.1

PROJECTS

E-Commerce - <https://github.com/Sangram4213/E-Commerece>

- Tech Stack: React.js, Node.js, Cashfree API, Cloudinary, Firebase Authentication
- Developed a full-stack eCommerce application with a streamlined user experience.
- Integrated the Cashfree payment gateway for secure, efficient transactions, improving payment processing times by 30%.
- Utilized Cloudinary for media management, ensuring scalability for high-performance image handling.
- Implemented Firebase Authentication for robust user security, improving registration and session management efficiency.
- [Live Demo](#)

Netflix Clone <https://github.com/Sangram4213/netflix-gpt>

- Implemented user authentication using Firebase for secure login and signup functionality.
- Integrated TMDb API to fetch and display movies, including upcoming and popular titles.
- Enhanced search functionality by leveraging the Groq AI API to fetch movie names using AI-powered suggestions.
- Developed a dynamic frontend using React and Redux Toolkit, ensuring a smooth and efficient user experience.

SKILLS

- Frontend: React.js, Redux Toolkit, TypeScript, JavaScript
- Backend: Node.js, Express.js, MongoDB
- DevOps/Cloud: AWS, Git, Serverless, Serverless-Webpack
- Other: Java, Data Structures & Algorithms (DSA), Problem Solving
